

# LeydenJar

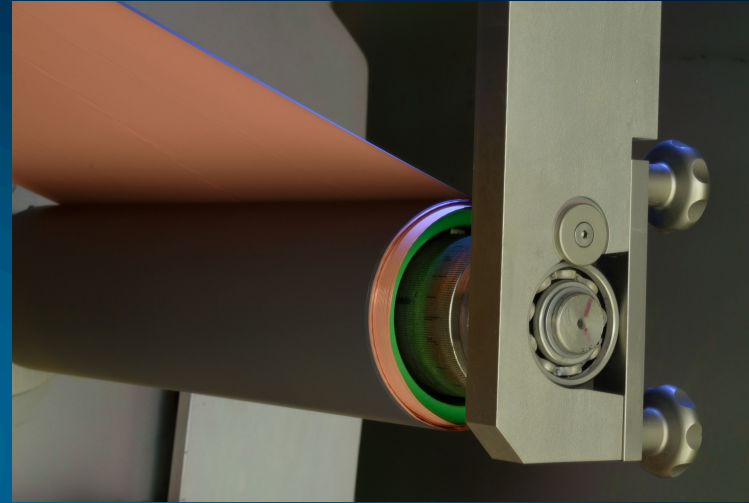

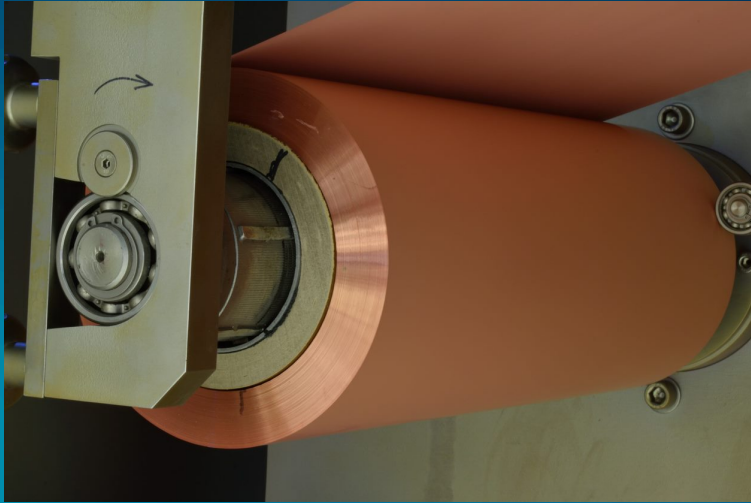

ENERGISING TECHNOLOGIES

2m pitch CES 2021

# batteries contain too little energy large unmet need for innovation

# we made 100% silicon anodes work

1350 Wh/l

400 Wh/kg

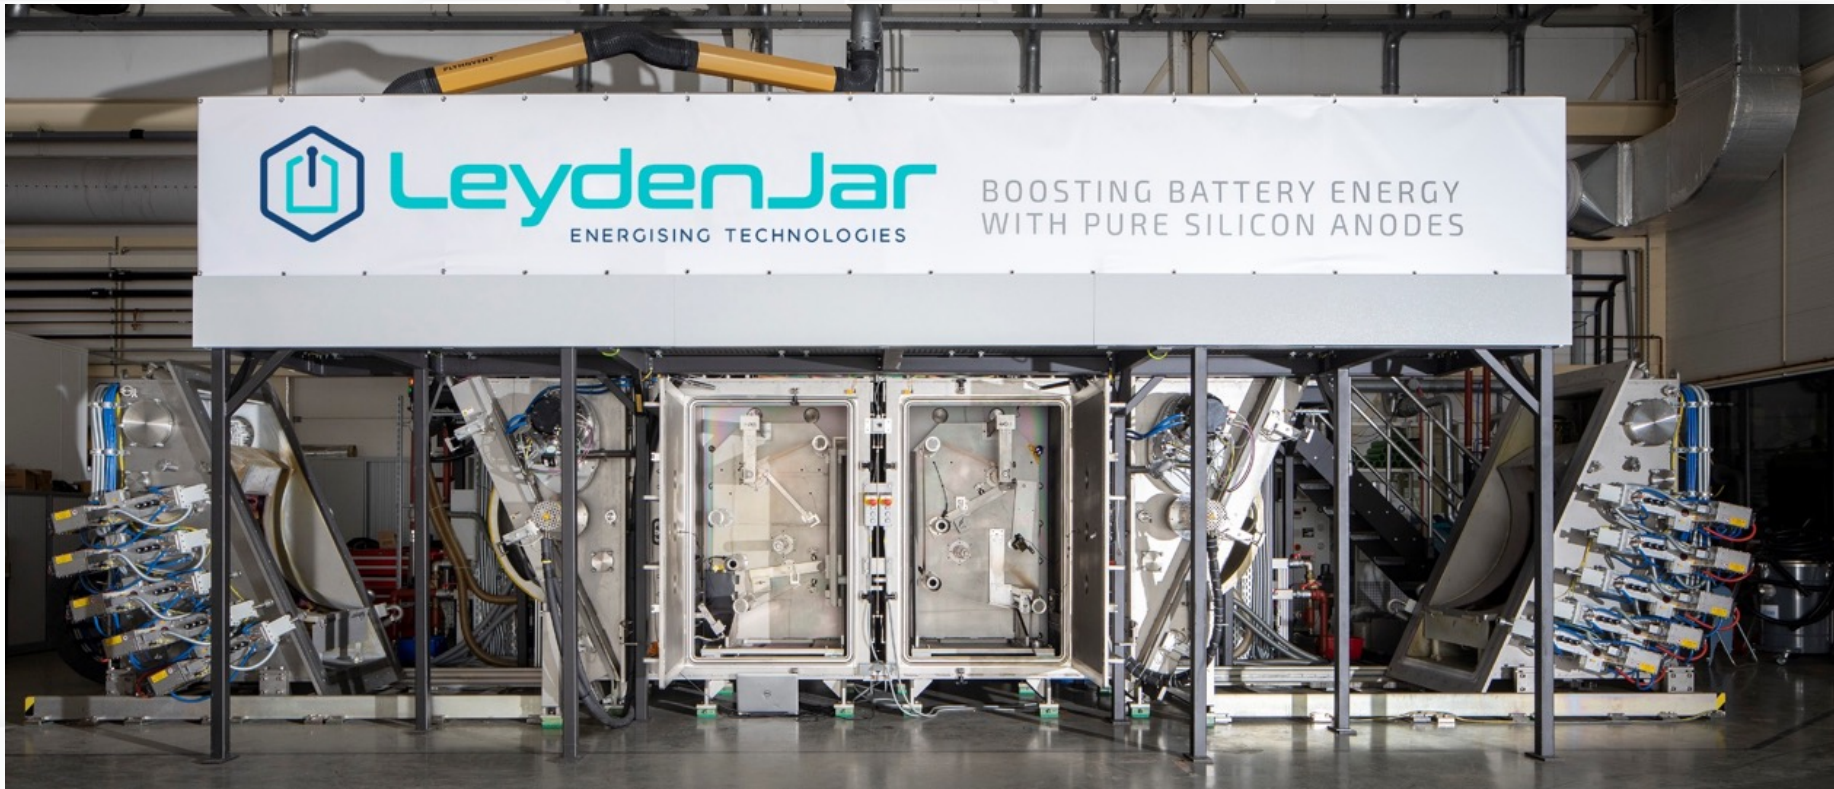

200 cycles

4,5 C

patented

# can be plugged into Gigafactories

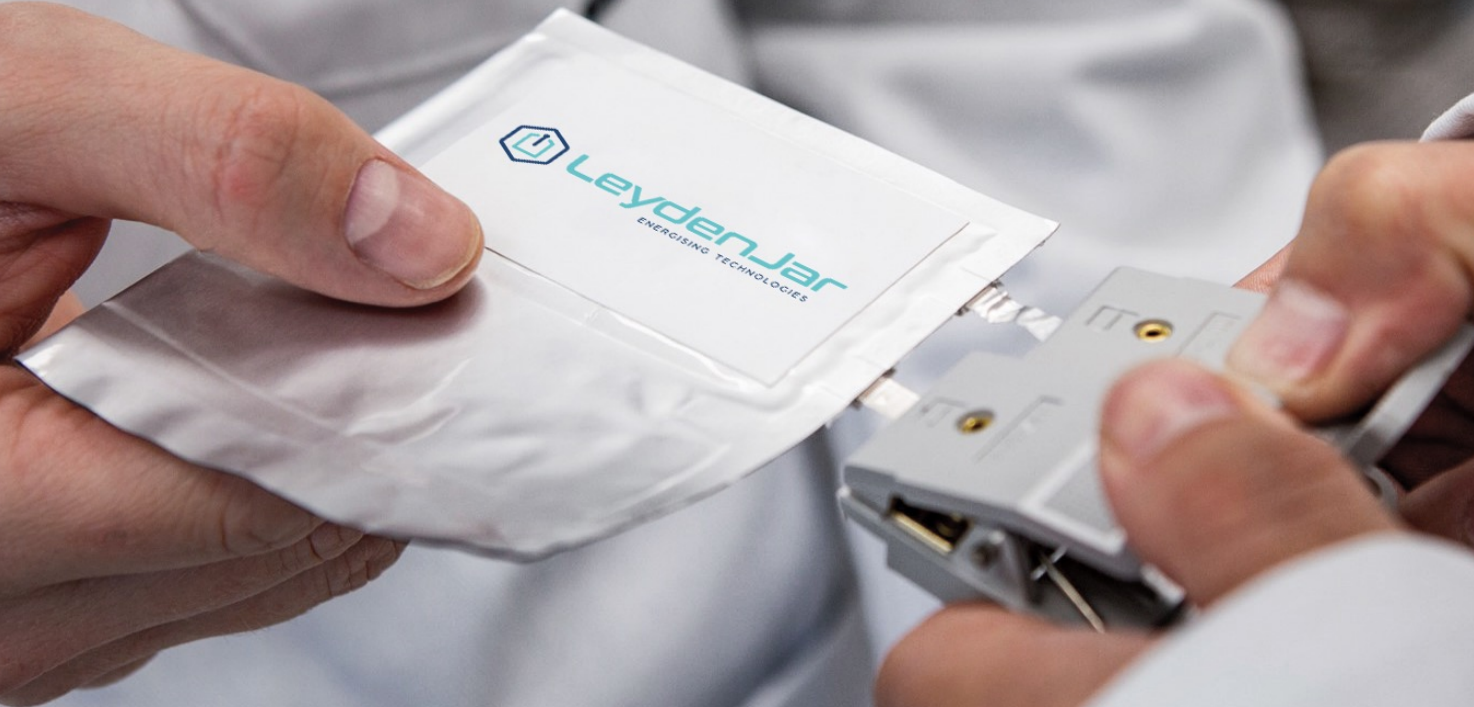

scalable

cost parity

85% less CO<sub>2</sub>

# anode focus & paying customers

in paid qualification projects with world's leading OEM's and battery makers

e-flight   defense   medical   consumer electronics   automotive

€ 15 mln round to prepare ramp up
